7. Drew cash for personal use Rs.2000
8. Fire insurance premium paid in advance Rs.500
9. Salary due but not paid Rs.1500

Q.4. Prepare Accounting Equation from the following data:

1. Dinesh started business with cash 50000, stock 30000 and furniture 20000
2. Purchased goods on credit 20000
3. Sold goods costing 25000 for 40000 on credit
4. Paid rent for office 2000
5. Received 20000 from debtors
6. Paid for Life insurance 1000
7. Wages of workers due but not paid 2500
8. Depreciate furniture @20% for 3 months
9. Purchased Machinery for cash 15000

Q.5. Prepare Accounting Equation from the following:

1. Ehsan started business with cash Rs.60000
2. Purchased goods on credit Rs.6000
3. Purchased furniture Rs.500 cash for personal use of proprietor
4. Withdrew cash for private use Rs.500
5. Paid salaries Rs.200
6. Received commission Rs.100
7. Sold goods costing Rs.500 at a profit of 40% on credit
8. Received from debtors Rs.200

Q.6. Prepare Accounting Equation from the following information:

1. Fundoo started business with Stock-15000, Cash-25000 and Furniture-10000
2. Purchased goods worth 25000 and paid half the amount in cash.
3. Sold goods costing 15000 at 33.33% profits and received half the amount in cash.
4. Paid salaries 5000 in cash and outstanding salaries are 2000.
5. Paid rent in advance to the Land lord – 1500.
6. Charge depreciation on furniture @ 12% p.a. for two months
7. Provide interest on capital @ 24% p.a. for two months.

Q.7. Anil commenced business on 1<sup>st</sup> January with a capital of 30000. On 31<sup>st</sup> December his assets were 50000 and the liabilities were 10000.

Find his capital and profit earned during the year.

Find his capital and profit earned during the year if his drawings were 10000 and additional capital was 15000.

Q.8. (1) Brijesh started business with cash Rs. 3,50,000.

(2) Salary paid Rs. 25,000.

(3) Commission received Rs. 2,500.

(4) Commission received in advance Rs. 1,000.

(5) Prepaid rent Rs. 4,500.

(6) Accrued commission Rs. 3,300.

(7) Wages outstanding Rs. 15,000.

Q.9. (1) Charlie started business with

Cash Rs. 3,50,000

Building Rs. 1,00,000

Stock Rs.50,000

(2) Interest on capital Rs. 35,000

(3) Depreciation charged on building Rs. 10,000

(4) Money withdrawn from business for Personal use Rs. 50,000

(5) Goods withdrawn for personal use Rs. 20,000

(6) Interest on drawings Rs. 2,000

Q.10. Prepare a 'T' – shape account of Machinery from the following information:

1. Purchased machinery for 50,000
2. Purchased another machinery for 30,000
3. Sold machinery for 5,000
4. Depreciate machinery by 8,000
5. Machinery discarded by 2,000

Q.11. Prepare a 'T' – shape account of the proprietor Rohit from the following:

1. Started business with cash 1,00,000
2. Withdrawn for personal use 10,000
3. Profit earned 50,000
4. Introduced fresh capital 25,000

Q.12. Prepare 'T'- shape accounts of cash, debtor and creditor from the following:

1. Sold good to Kritigya for cash 50,000
2. Purchased goods from Sanya for 25,000
3. Sold goods to Kritigya for 30,000
4. Sanya returned goods for 5,000
5. Kritigya returned goods for 5,000
6. Cash paid to Sanya 15,000
7. Cash received from Kritigya 40,000

Q.1. Fill Journal entries assuming that the narrations are correct

| Date                                 | Particulars                                                                                                                   | L.F | Debit amount | Credit amount |

### Economics

#### Problem based on Production Possibility Curve

1. Make an imaginary production possibility schedule so that the production possibility curve is concave to the origin.
  2. Make an imaginary production possibility schedule so that the production possibility curve is convex.
  3. Make an imaginary production possibility schedule so that the production possibility curve is a straight line.
  4. An economy produces two goods. X and Y. The following table summarises its production possibilities. Calculate the marginal opportunity cost of X at various combinations.
- |                  |        |        |        |        |        |        |
|------------------|--------|--------|--------|--------|--------|--------|
| X (in millions)  | 0      | 1      | 2      | 3      | 4      | 5      |
| Y (in thousands) | 90,000 | 80,000 | 68,000 | 52,000 | 34,000 | 10,000 |

#### Problem based on Consumer's Equilibrium

1. Following is the utility schedule of a person

|                |    |    |    |    |    |    |
|----------------|----|----|----|----|----|----|
| Units Consumed | 1  | 2  | 3  | 4  | 5  | 6  |
| TU (utils)     | 10 | 18 | 24 | 28 | 30 | 30 |

Suppose price of commodity is Rs.2 per unit and marginal utility of 1 rupee is 2 utils. How many units would the consumer consume to be in equilibrium?

2. Following is the utility schedule of a person

|               |    |    |    |    |    |
|---------------|----|----|----|----|----|
| Unit consumed | 1  | 2  | 3  | 4  | 5  |
| MU (utils)    | 60 | 50 | 40 | 30 | 20 |

Suppose price of commodity is Rs.3 and marginal utility of 1 rupee is 10. How many units will be consumer consume?

3. Ice cream sells for Rs.30. Lakshmi, who loves ice cream, has already eaten three. Her marginal utility from eating three ice creams is 90. Suppose further, that for her the marginal utility of one rupee is three, should she eat more ice creams or should she stop?
4. What happen to the budget line if both the prices as well as the income double?
5. Suppose a consumer can afford to buy 6 units of good 1 and 8 units of good 2 if she spends her entire income. The prices of the two goods Rs.6 and Rs.8 respectively. How much is the consumer's income?
6. Suppose a consumer wants to consume two goods which are available only in integer units. The two goods are equally priced at Rs.10 and the consumer income is Rs.40.
  - (i) Write down all the bundles that are available to the consumer.
  - (ii) Among the bundles that are available to the consumer, identify those which cost him exactly Rs.40.
7. If a consumer has monotonic preferences, can he be indifferent between the bundles (10, 8) and (8, 6)?
8. Suppose a consumer's preferences are monotonic. What can you say about his preference ranking over the bundles (10, 10) (10, 9) and (9, 9)?
9. Suppose your friend is indifferent to the bundles (5, 6) and (6, 6). Are the preferences of your friend monotonic?
10. A consumer wants to consume two goods. The prices of the two goods are Rs.4 and Rs.5 respectively. The consumer's income is Rs.20.
  - (i) Write down the equation of the budget line.

|                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
